ABOUT AHMEDPUR

Ahmedpur is a town located in the large ranges of Balaghat in Marathwada region of Maharashtra. It was under the domain of the Nizam Empire of Hyderabad. The town was affected by the tyrannical treatment of Nizam's paramilitary force Razakar. The Britishers left India in 1947. Still Ahmedpur was deprived of the wave of freedom. The sun of freedom arose on the horizon of Ahmedpur on 17 September 1948. Ahmedpur was a taluka in Osmanabad district and now in the district of Latur. It is sixty-five kilometres away from the district headquarters in Latur. Ahmedpur is surrounded by small villages. There is no industrial culture or industries. That's why people are dependent on farming as a source of earning and livelihood. The land around Ahmedpur is low fertile and non-irrigated. Ahmedpur has been a centre of education for the people in the region.

ABOUT COLLEGE

ABOUT KSP MANDAL

People with patriotic and missionary zeal felt a dire need to educate unprivileged communities of this area and established the "KisanShikshanPrasarak Mandal" in 1964 with the motto Bahujan Hitay BahujanSukhay (Welfare and Betterment of the masses). Today the trust has 21 institutions including schools and colleges located in different rural areas with goals and objectives involving the holy task of educating the masses. Initially, trust was facing a financial crisis. To build and nurture an institution in such an economically, socially and educationally backward area, without anyone to patronize or help financially was not a simple task. However, our founding fathers overcame every moment of crisis with their strong willpower and missionary zeal and succeeded in this Herculean task. Today, the KSP Mandal, Udgir has won the vote of repute because of its selfless activities and contribution to the cause of education.

ABOUT CONFERENCE

On the occasion of the silver jubilee year, Mahatma Phule Mahavidyalaya, Ahmedpur proposed to organize a national conference on artificial intelligence and research. Generative artificial intelligence is artificial intelligence capable of generating text, images, videos, or other data using generative models, often in response to prompts. Generative AI models learn the patterns and structure of their input training data and then generate new data that has similar characteristics.

Improvements in transformer-based deep neural networks, particularly large language models, enabled an AI boom of generative AI systems in the early 2020s. These include chatbots such as Chat GPT, Copilot, Gemini text-to-image artificial intelligence image generation systems such as Stable Diffusion, and Mid journey and text-to-video AI generators such as Sora. Companies such as Open AI, Anthropic, Microsoft, Google, and Baidu as well as numerous smaller firms have developed generative AI models.

Generative AI has uses across a wide range of industries, including education, software development, healthcare, finance, entertainment, customer service, sales and marketing, art, writing, fashion, and product design. However, concerns have been raised about the potential misuse of generative AI such as cyber crime, the use of fake news or deep fakes to deceive or manipulate people, and the mass replacement of human
